FOREWORD

Town and School District Profiles, 1985-86, is the eighth annual edition of this publication. It contains a concise presentation of statistics about Connecticut's educational system drawn from major state and federal sources, clearly arranged for each town and school district. A companion publication, *Meeting the Challenge, 1986*, reports on the overall condition of education in Connecticut and on progress on related policy initiatives.

At this time there is significant public discussion about indicators of the condition and quality of education. The data presented here include input measures, such as staffing, spending, and community characteristics; process measures, such as curriculum statistics; and outcome measures, such as graduate data and mastery test scores. Judicious use of these measures can provide meaningful insights into educational offerings statewide.

In recent years demand for this publication has outstripped available supplies. This indicates a broad interest in data about our school systems. The State Department of Education is committed to supplying accurate information about the state's public schools to all interested parties. We hope that good information will help all of us find new ways to improve the education of all Connecticut's children.

Special Education	The state support percentage, based on town wealth, used to calculate special education grants to school districts for 1986-87. These percentages range from 30 percent to 70 percent.
Transportation	The state support percentage, based on town wealth, used to calculate transportation grants to school districts for 1986-87. These percentages range from 20 percent to 60 percent.

Each town has a unique Minimum Expenditure Requirement based on (1) the state's 75th percentile pupil expenditure level in the third previous year, (2) the concentration of economically deprived children between the ages of 5 and 18 in the town, and (3) the town's Minimum Expenditure Requirement in the previous year.

EXPENDITURE DATA

All expenditures shown in this section are based on fiscal reports submitted by local school districts, "End of Year School Report," Form ED-001, September 1986. Expenditures are grouped in terms of function, i.e., the purpose for which an expenditure is made. Unless otherwise noted, expenditures include expenditures from federal, state and local funds.

Total Expenditures	All expenditures for programs and services for public elementary and secondary school students, except expenditures for adult education programs, community services, and services for nonpublic school students. Total expenditures include expenditures for resident students educated outside the district as well as expenditures for students, resident and nonresident, who attend district schools. The per pupil amount is based on the total number of students attending district schools plus the number of resident students educated outside the district.
Net Current Expenditures	Total expenditures, as defined above, less the sum of expenditures for pupil transportation and capital equipment and tuition receipts for nonresident students. This amount represents current operating expenditures for all resident pupils. The per pupil amount is based on the average daily membership of the district.
Regular Instruction	The sum of district expenditures for regular instructional programs and for the improvement of instruction. The per pupil amount is based on the total number of students in district schools.
Special Education Instruction	The sum of district expenditures for special education instructional programs
Compensatory Education Instruction	The sum of district expenditures for supplemental compensatory education programs
Pupil Support Services	The sum of district expenditures for pupil services such as social work, guidance, health, psychological, speech and hearing services. The per pupil amount is based on the total number of students in the district.
Administration	The sum of district expenditures for administrative services. The per pupil amount is based on the total number of students in the district.
Fiscal and Other Support Services	The sum of district expenditures for fiscal, business and central office services. The per pupil amount is based on the total number of students in the district.

Transportation	The sum of district expenditures for all pupil and other transportation. The per pupil amount is based on the number of students reported as receiving transportation to public and nonpublic schools at the expense of the local public school district.
Food Services and Student Activities	The sum of district expenditures for food services and student activities. This sum represents net food services expenditures plus net student activities expenditures (i.e., total expenditures less sales revenues). Where sales revenues meet or exceed expenditures, net food services expenditures may be reported as zero.
Operation and Maintenance of Plant	The sum of district expenditures for the operation and maintenance of school buildings and property. The per pupil amount is based on the total number of pupils in the district.
Tuition Payments to Other Districts	The sum of district expenditures for tuition for resident students educated outside the school district. The per pupil amount is based on the number of resident students for whom tuition is paid.
Land, Buildings and Debt Services	The sum of district expenditures for the acquisition of land and buildings and for paying the principal and interest on school bonds. The per pupil amount is based on the total number of students in the district.
Net Current Local Education Expenditures	The sum of education expenditures from local taxes excluding any expenditures for adult education programs, health and welfare services for nonpublic school students, and capital expenditures. This is the measure of local taxes for elementary and secondary education programs used to calculate Educational Equalization Aid grants. The per pupil amount is based on the district's average daily membership (ADM). No amount is shown for high school regional school districts. Local taxes used to support high school districts are included with local taxes for elementary school districts in the member towns. For K-12 regional school districts, the amount shown is the sum of local taxes from all member towns.
Percent Above or Below Median	The per pupil amount compared to the state median per pupil amount for the expenditure category. The state median is shown in the Connecticut section preceding the individual town profiles. No comparison to a state median is shown for tuition payments.
